DAILY BULLETIN SUMMARY THE

Daily Bullefin

Pledged to neither Sect nor Party, But established for the benefit of all.

FRIDAY, MAY 4, 1888.

THE GAZETTE.

The BULLETIN cares nothing whether the Gazette is the organ of the Government or not. We are not in the habit of referring to our contemporary as "the Government organ," or as the "Government wind bag," or as "the boodle sheet," or by any other extemporised appellation, but simply as the "Gazette," the name assumed by itself. There was a period, early in the life of the Gazette as a "daily," when we may have styled it the "Government organ;" but never, we think, since it came fully under the present control. Our contemporary's assertion this morning, that "the Belletis impertmently refers to the Gazette as the 'recognised Covernment organ, " is hasty and inaccurate. The BULLETIS, in the matter referred to, simply recorded the talk which was heard, and heard too, by many, at the ball of the previous evening. It was not the Bulletin, impertinual or pertinent, which referred to the Gazette as "the recognised Government organ," but a number of persons did, and the BULLETIN reproduced their words. We neither affirm nor deny

AN INTERVIEW WITH A PROMI-NENT PHYSICIAN.

that the Gazette is the organ of the

Government, nor care the smallest

trifle whether it is or not.

A representative of the BULLETIN happened into the office of a promishown by the genial doctor a large number of pathological specimens prepared by himself for microscopic examination, also some improved instruments for the preparation of the specimens. In the course of the conversation that intervened, the subject of leprosy was introduced, and the doctor in answer to the question of what he thought the leprous germ was, remarked that in his opinion it was an animal bacillus, but how it originated, and how it was propagated in the human system was as yet unexplained. He advanced a theory, however, that the germ was originally disseminated through the medium of uncooked fish; for, said the doctor, we know that people who subsist on a fish diet-in a raw state, either dried or fresh-are more or less troubled with leprosy; while those who subsist on fish, but eat it cooked, are not so afflicted. Take, for instance, he said, the inhabitants of Scandinavia, Newfoundland, parts of Canada, China and the Sandwich Islands, all these people cat fish raw, either dried or fresh, and have leprosy among them, while in England, France, America, and other countries, large numbers of the population live entirely on fish; but it is cooked, and thus they escape the ravages of the bacillus that may exist in the fish, but is destroyed by cooking.

Yes, but how can you account for the immunity of the natives of Hawall in former times from the ravages of of this bacillus, if it exists in fish? Their principal food was raw fish, and often the lish was not even dead before it was served up on the table of some Hawaiian epi-

At that time the germ had not found a home in the fishes indigenous to Hawaiian waters. It is more than probable that it was brought here by Chinamen in the dried fish that they brought from home with

them. The natives call the disease the "mai Pake," meaning the "Chinese sickness," yet there is no authentic record that the disease was brought here by a Chinaman being bodily afflicted with it. My belief is, the doctor went on to say, that the disease was first introduced here through the medium of fish imported from China, and the bacillus found its way, through offal, sewerage, or other ways to the feeding grounds of the fish that swarm in our waters. Mind you, said the doctor, I don't pretend to say that all fishes are diseased, or that my theory is correct, but if I had the time, and

What do you think of Dr. Arning's experiments and researches into the origin and progress of

leprosy ? They were very good so far as they went, but he gave up the re-search at a time when he should have prosecuted his studies more vigorously. I would, if I were financially able, go much farther than he did, and I am better equipped with instruments of all kinds for prosecuting the study than he

At this point a patient came into the office and the doctor very reluctantly dropped the subject; but told the representative that if he would call some other time, he would explain more fully his reason for believing the bacillus of leprosy was propagated in fishes.

FRANCE.

CONFIDENCE IN THE MINISTRY-OPPOSITION TO BOULANGER.

Paris, April 23-Another vote of confidence in the Ministry was taken n the Chamber of Deputies to-day, preceded by a discussion, with scenes of excitement, which are familiar in the Chamber. The vote stood 377 to 175.

Another anti-Boulanger manifestation was made in the Quartier Latin at midnight, when a party of students burned General Boulanger in

effigy. A final split has occurred in the French Patriotic League, the delegates refusing by a vote of 21 to 18 o sanction the nomination by the managing committee of M. Paul Deroulede, for honorary President of the league. The group acting conjointly with M. Deroulede have decided to reform the league on a new basis.

Pere livacinthe is the latest convert to Boulangerism. In a sermon yesterday he advocated Casarism and advised the one-man power in

the control of the nation's destinies. The Municipal Council, after a violent discussion, to-day adopted the order of the day opposing a plebiscite, condemning Boulanger's campaign and declaring the Council ready to place itself at the head of the people in order to save their liberties and preserve the republic.

The Prefect of Police protested against the charge that he had shown eniency toward the Boulangerists. He declared he would suppress all lotous bands. The Council resolved to accept the protests and asked the Prefect to expel all anti-Republican officers.

In the Chamber of Deputies today Count de Marinprey interpellated Premier Floquet regarding the appointment of a civilian (De Freycinet) as Minister of War, declaring it to be revolutionary and sure to have a bad effect on the army.

Floquet cited the success of the vilian war ministers of ancient monarchs and referred to Freyeinet's patriotism in 1870.

The Chamber adopted an order expressing confidence in the Government.

GIVE THEM A CHANCE.

Why am I a woman suffragist? Because I am. Because a woman has more good, hard, common-sense than a man. Because she makes less bluster about her rights, and quietly maintains them better than a man. Because she won't pay \$1.50 for an article that she knows very well she can get for 75 cents. Because she does not stalk loftily away from the counter without her change if the robber behind it is a little reluctant about counting it out. Because she is too independent to pass the landlord \$2.25 for her dinner and then pay the head waiter \$1 to send her a waiter who will bring it to her for 50 cents. Because she will hold her money tightly in her own good little right hand for two hours until she first gets a receipt for it from the fellow who made her husband pay the same bill three times last year. Not any "just give you credit for it" for her.

Because one day a Pullman porter complained to me: "No money on this trip; too many women aboard. Don't never get nothin' out of a woman 'ceptin' just her regular fare." I had just paid him 25 cents for blacking one of my boots and losing the other; and when he said that, when I saw for myself the heroic firmness of those women, traveling alone, paying their fare, and refusing to pay the salaries of the employes of a wealthy corporation, I said: "These women have a right to vote." To vote? By all that is brave and selfreliant and sensible, they have a right to run the Government!-Bur-
